

TESLA HOME ENERGY

Solutions

Powerwall 3 & Wall Connector Package

Solar-ready Home Storage + EV Charging + Smart Backup
Designed, Installed, and Supported by Certified Experts

POWERWALL 3 — HOME BACKUP & STORAGE

- 13.5 kWh capacity, 11.5 kW output
- Keeps essential loads running during outages
- Supports solar integration & time-of-use optimization
- Indoor or outdoor installation, expandable

WALL CONNECTOR — FAST EV CHARGING *(Charging Station)*

- Up to 11.5 kW / 48A, adds ~71 km/hour for Tesla (typical)
- Charges EVs safely indoors or outdoors
- Wi-Fi connected, firmware updates remotely
- Works with Powerwall for backup charging during outages

WHY INSTALL A TESLA ENERGY PACKAGE?

 *Reduce Energy Costs*

Store energy when electricity rates are low and use it during peak-rate hours to lower monthly bills.
Powerwall can reduce reliance on the grid during high-demand periods, helping homeowners avoid expensive peak charges.

 *Increase Home Value & Appeal*

Solar-ready and battery-backed homes are “future-proof,” appealing to buyers seeking long-term energy savings, reliability, and environmental responsibility.

 *Future-Ready & Sustainable Lifestyle*

Keep critical loads powered, maintain comfort and safety, and avoid inconvenience from power disruptions.

Tesla’s 10-year warranty and app-based monitoring ensure ongoing reliability and remote system management.
